Ulaganje u napredak, u svijest da bi tvrtke koje pridonose rješavanju glavnih problema planeta mogle biti najbolje pozicionirane za rast - to znači poslovati na održiv način. Novi donositelji odluka traže održivija rješenja za investiranje; Vlast i vlada integriraju održivost u procjene o ulaganju i procese donošenja odluka; Postoje institucionalni fondovi i kreditni instrumenti namijenjeni financiranju ulaganja u održivost.

Radimo na postizanju integracije svih sustava upravljanja, kombinirajući obveze i učinkovitost kako bismo postigli najviše razine konkurentnosti.

UPRAVLJANJE USKLAĐENOSTI

Korporativna usklađenost jedno je od najviše zabrinjavajućih područja rizika za javne i privatne organizacije. Implementacija robustnog programa usklađenosti i etike temeljenog na poslovnim vrijednostima i specifičnim rizicima pomogla je organizacijama da održe integritet i izbjegnu ili minimiziraju probleme neusklađenosti. Usmjeravamo organizacije u upravljanju njihovom usklađenošću s važećim zakonima i primjenjivim standardima i kodeksima, implementirajući zahtjeve ISO standarda 37301 (ex ISO 19600). Implementiramo sustave upravljanja usklađenošću integrirajući ih s ostalim sustavima upravljanja.

RAZNOLIKOST, JEDNAKOST I UKLJUČENOST (DEI)

Pomažemo organizacijama da riješe pitanja jednakosti, raznolikosti i uključenosti, koja se sve više doživljavaju kao strateški čimbenici uspjeha. Slijedeći lokalne zakonske zahtjeve i međunarodni standard ISO 30415, nudimo usluge procjene, savjetovanja i edukacije na tu temu.

PROCJENA NAJBOLJE PRAKSE UPRAVLJANJA

Dobro upravljanje znači da se donošenje odluka unutar organizacije temelji na organizacijskoj etici, kulturi, normama, praksi, ponašanju, strukturama i procesima. Dobro upravljanje stvara i održava organizaciju s jasnom svrhom koja pruža dugoročnu vrijednost u skladu s očekivanjima relevantnih dionika. Godine 2021. objavljen je ISO 37000 – Smjernice za upravljanje organizacijama – koji je postao najbolja praksa na tu temu. Nudimo usluge procjene i savjetovanja organizacijama koje namjeravaju "izmjeriti" svoju upravljačku strukturu prema najboljoj praksi.

EDUKACIJA

Analiziramo stvarne potrebe javnih i privatnih organizacija, utvrđujući i osiguravajući potrebnu edukaciju.

SUSTAINABILITY: MANAGEMENT AND REPORTING - GREENWASHING

The next decision-makers are looking for more sustainable investment solutions; Authorities and governments are integrating sustainability into investment information and decision-making processes; There are institutional funds and credit instruments dedicated to the financing investment in Sustainability. We guide organizations in the Management and Reporting their own Sustainability, avoiding greenwashing (Dir. UE 2024/825, Dir. Green Claims and the other European Directives and Regulations related to Sustainability), implementing the principles related to the ESRS/EFRAG, the GRI, the ISSB/IFRS, the ISO Standards and the UN SDGs and supporting in the creation of Sustainability Reports.

MANAGEMENT SYSTEMS

For 30 years we have been operating in the field of Consulting, Auditing and Training of certifiable and non-certifiable Management Systems to comply with the various International Standards. We work to obtain the integration of all management systems, combining obligations and efficiency to reach the highest levels of competitiveness.

COMPLIANCE MANAGEMENT

Corporate Compliance is one of the most worrying areas of risk for public and private organisations. The implementation of a robust compliance and ethics program based on business values and specific risks has helped organisations maintain integrity and avoid or minimise non-compliance issues. We guide organisations in managing their compliance with current legislation and applicable standards and codes, implementing the requirements of ISO Standard 37301 (ex ISO 19600). We implement the Compliance Management Systems integrating them with the other management systems of the activities.

DIVERSITY, EQUITY & INCLUSION (DEI)

We help organisations to address the issues of Diversity, Equity and Inclusion, more and more perceived as strategic success factors. Following the local legislative requirements and the international standard ISO 30415, we offer assessment, consultancy and training services on the subject.

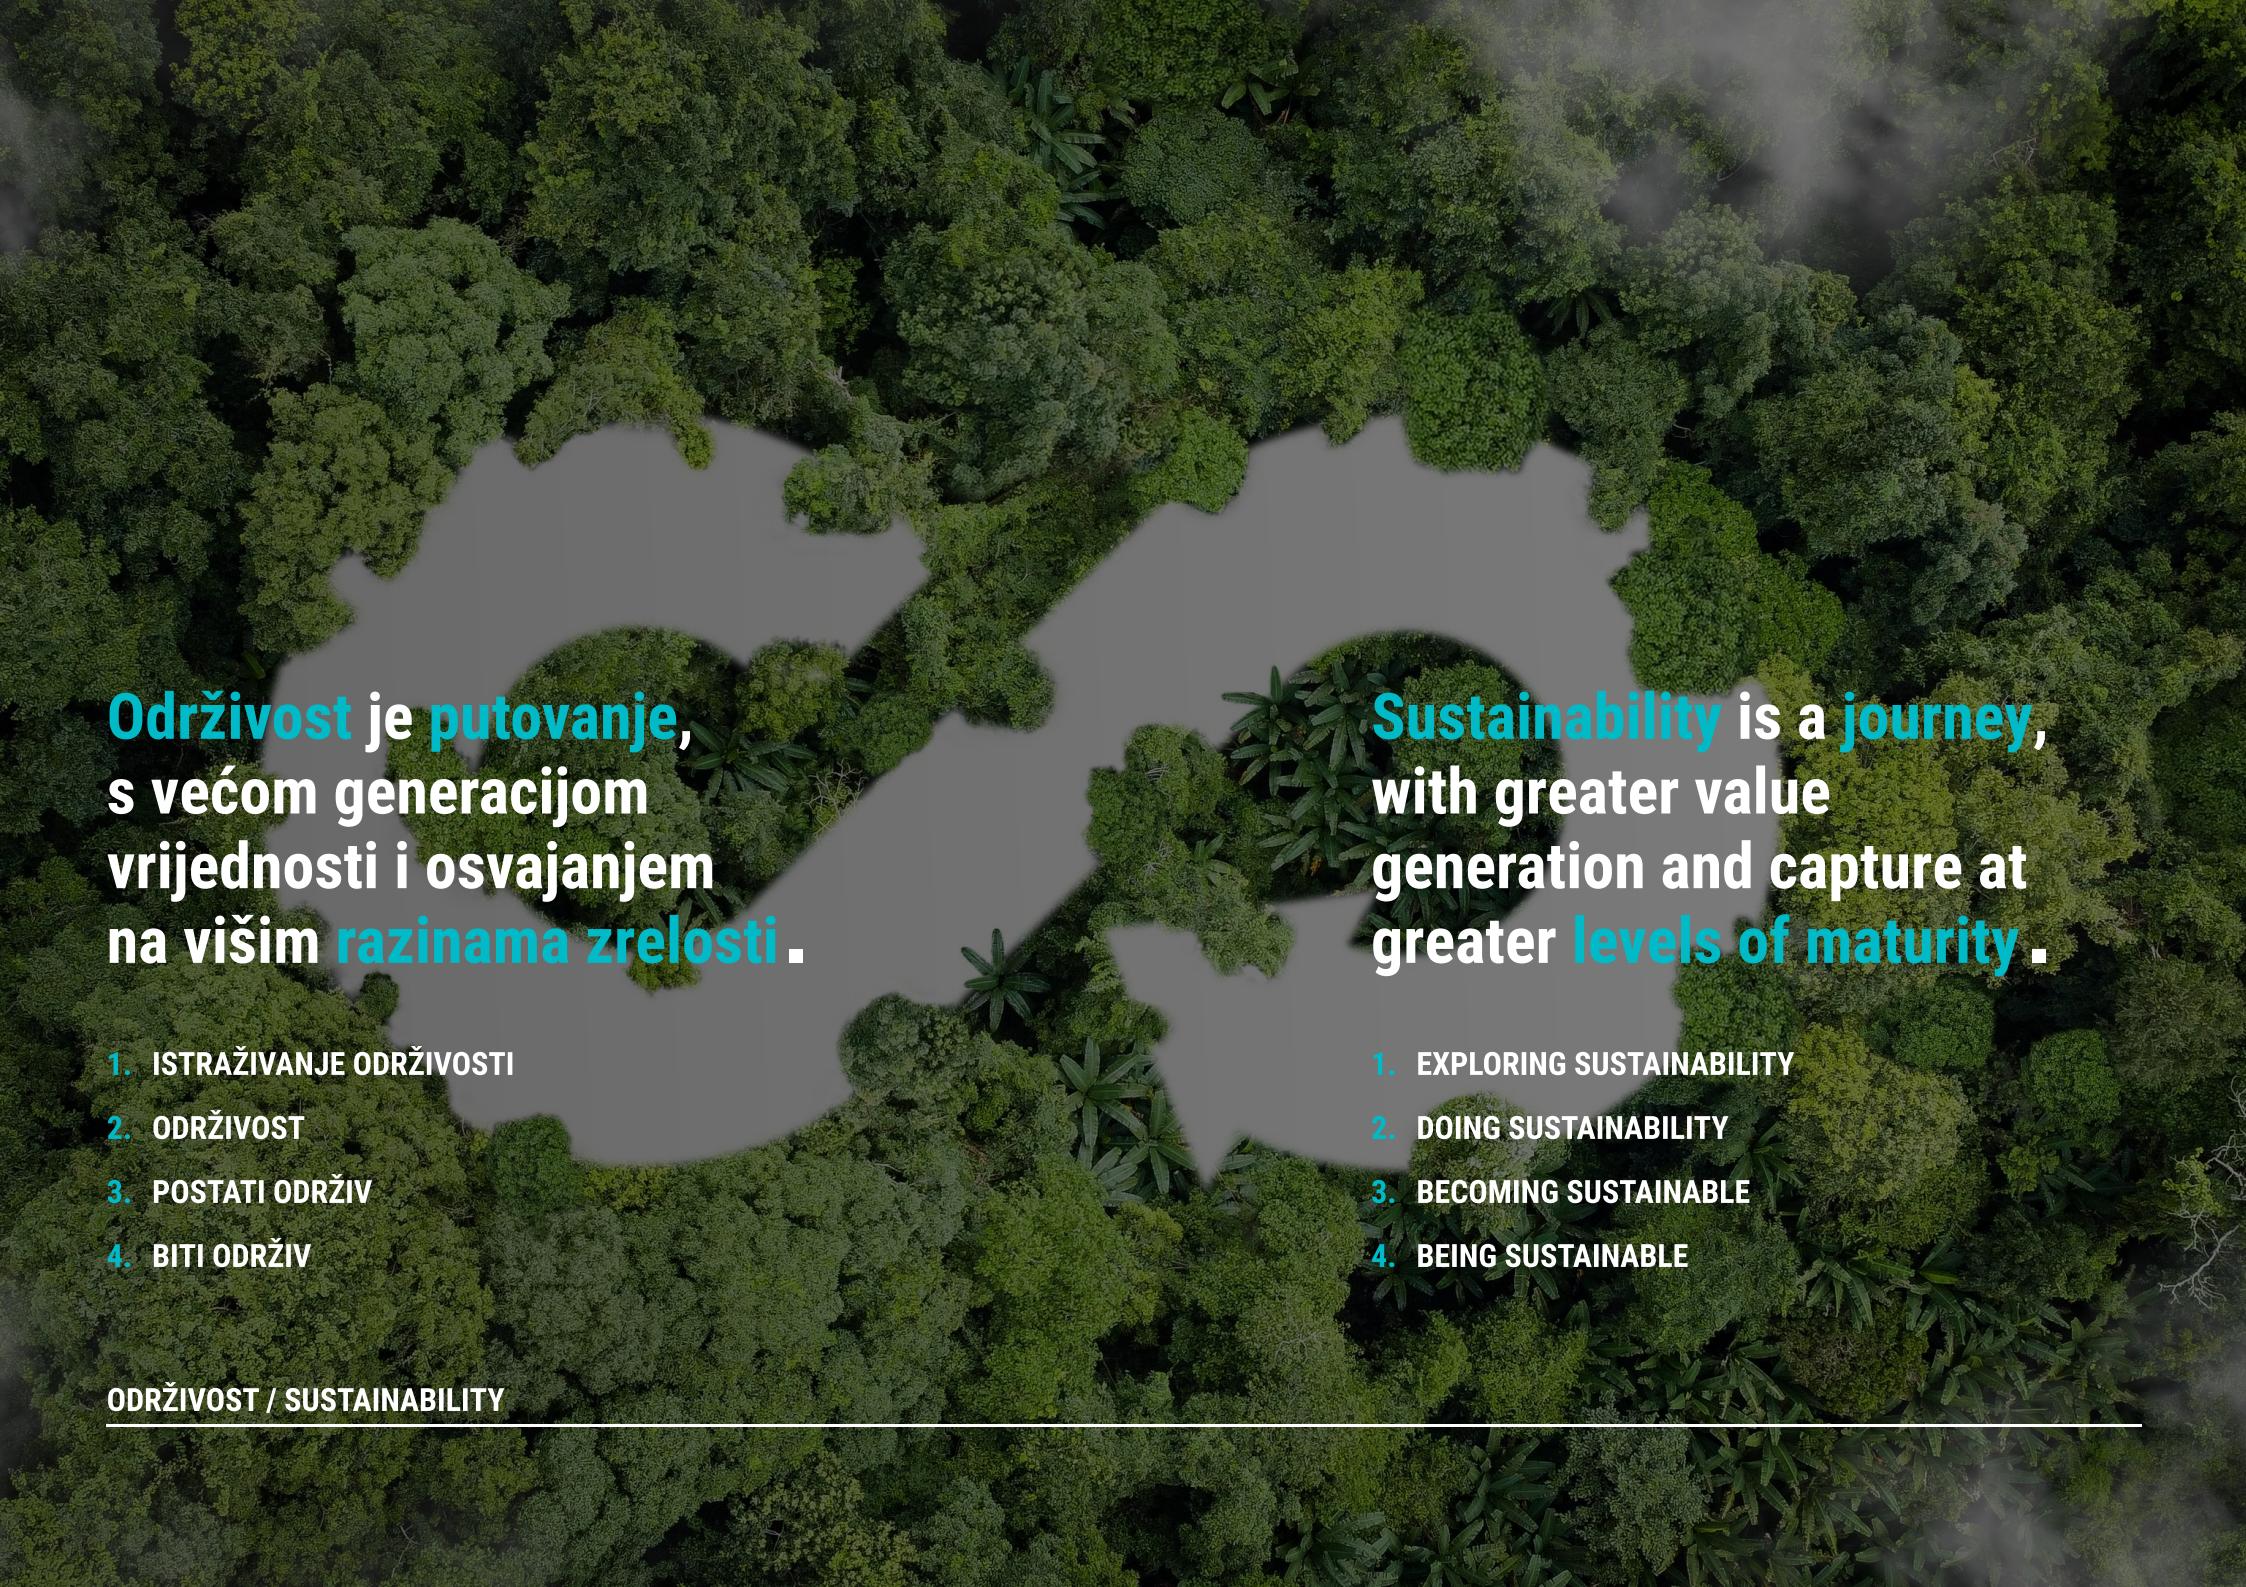

GOVERNANCE BEST PRACTICE ASSESSMENT

Good governance means that decision-making within the organisation is based on the organisation's ethos, culture, norms, practices, behaviors, structures and processes. Good governance creates and maintains an organisation with a clear purpose that delivers long-term value consistent with the expectations of its relevant stakeholders. In 2021, the ISO 37000 - Guideline for the Governance of organizations - was published, becoming the Best Practice on the subject. We offer assessment and consultancy services to organisations that intend to "measure" their governance structure against Best Practice.

TRAINING

We analyse the real needs of public and private organisations, determining and providing the necessary training.
